

Project Initialization and Planning Phase

Date	30 September 2026	Team ID	MKU201SpreadSheet
Project Name	ServiceNow – Spreadsheet Data Import Project	Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand the ServiceNow user from four perspectives — what they Say, Think, Do, and Feel — in relation to the spreadsheet data import problem.

SAYS	THINKS
• I want to import spreadsheet data into ServiceNow easily. • I need the employee data to be accurate. • I want to avoid entering records manually.	• Will all spreadsheet columns map correctly? • What happens if a value is missing or invalid? • Can the imported records be checked after the upload?
DOES	FEELS
• Prepares employee data in a spreadsheet. • Uploads the spreadsheet into ServiceNow. • Maps fields and checks imported records.	• Wants the import process to be simple. • Feels confident when records are imported correctly. • May feel concerned about data errors or incorrect field mapping.

PERSONA	NAME	ServiceNow Data Import User
	Role / User Type	Employee / ServiceNow user responsible for importing spreadsheet data
