

Project Design Phase – Number of Functional Features Included in the Solution

Date: 30.09.2026 **Team ID:** MKU201SpreadSheets
Project Name: Import data using Transform Maps

Functional Feature Count

Based on the supplied project implementation/screenshots, the solution can be described through the following distinct functional features. The count is a project-documentation count of demonstrated capabilities, not a claim about an official ServiceNow product feature count.

No.	Functional feature	Evidence / purpose
1	Spreadsheet data source	Employee data is supplied with Employee ID, Name, Email, Department and Location.
2	Load Data import	ServiceNow Load Data is used to bring the source file into the import process.
3	Import Set staging	Employee Import [u_employee_import] provides the staging layer.
4	Transform Map processing	Transform Map provides the source-to-target transformation layer.
5	Employee target records	Employee Tests [u_employee_test] provides the target employee-record view.
6	Record validation / filtering	Employee Tests list allows the imported employee records to be reviewed.
7	Import execution monitoring	Transform History exposes run status and record statistics.
8	Department reporting	Employees by Department report/dashboard view provides department-level analysis.
9	Location reporting	Employees by Location provides location-level analysis.
10	Employee list reporting	Employee List Report provides tabular employee information.
11	Employee Analytics Dashboard	Combines visual and list-based employee analysis in a dashboard.

Total Functional Features Documented: 11

Feature Grouping

Functional group	Features included	Count
Data ingestion	Spreadsheet source, Load Data, Import Set staging	3
Transformation & target	Transform Map, Employee target records, validation/filtering	3
Monitoring	Transform execution monitoring	1
Reporting & analytics	Department reporting, Location reporting, Employee List Report, Analytics Dashboard	4
Total		11

Observed Execution Evidence

The displayed Transform History execution shows 20 total records, 0 inserts, 0 updates, 3 ignored, 17 skipped and 0 errors. Separately, the dashboard screenshot displays 48 employee records with ServiceNow 32 (66.67%) and Salesforce 16 (33.33%). These are treated as separate displayed states/runs.

Scope Note

Only functions supported by the supplied project screenshots and previously documented project material are included. Features such as automated notifications, scheduled imports, scripted transformations or external integrations are not counted because they are not evidenced in the supplied material.
