

Technology Stack

Date: 30.09.2026 **Team ID:** MKU201SpreadSheets

Project Name: Import data using Transform Maps

Technology Stack Overview

Layer	Technology / component	Role in project	Evidence
Data source	Spreadsheet (Excel-style tabular data)	Provides employee records and the source columns.	Supplied spreadsheet screenshot.
Import mechanism	ServiceNow Load Data / Import Set	Receives the source file and stages data for transformation.	Load Data screen shows Employee Import [u_employee_import].
Transformation	ServiceNow Transform Map	Maps source employee fields to the target table.	Project title specifies Transform Maps; Transform History is shown for the Employee Import set.
Target data	ServiceNow Employee Tests [u_employee_test]	Stores the employee records used by the application/reporting.	Employee Tests list and report screens.
Reporting	ServiceNow Reports	Creates Employees by Department, Employees by Location and Employee List Report.	Reports screen.
Dashboard	ServiceNow Employee Analytics Dashboards	Visualizes department/location distribution and employee list information.	Dashboard screenshots.
Execution tracking	ServiceNow Transform History	Shows import run status and record counts.	Transform History screenshot.

End-to-End Technology Flow

Source	Integration	Transformation	Target	Analytics
Spreadsheet	Load Data / Import Set	Transform Map	Employee Tests [u_employee_test]	Reports + Employee Analy Dashboard

Implementation Notes

- The supplied screenshots support the use of ServiceNow for import, transformation, target records, reports and dashboarding.
- The screenshots do not expose the exact field-level Transform Map configuration, so individual source-to-target mapping names beyond the visible field names are documented as requirements/expected mapping rather than claimed as directly observed configuration.
- The shown dashboard summarizes 48 employee records by department and location, while the displayed Transform History run is a separate 20-record import execution; these figures should not be treated as the same run.
